

Here at The Awning Company we are proud to have supplied over 1000 awnings for 500 Renault Master vans that were built for the DHSC Mobile Testing Units - MTU. In partnership with TGS, LeasePlan and Renault these MTU's were equipped to the highest standards to support the DHSC Test and Trace Programme. In addition, The Awning Company has supplied a quantity of awnings as Mobile Laboratory Units through our commercial partners.

MTU by TGS

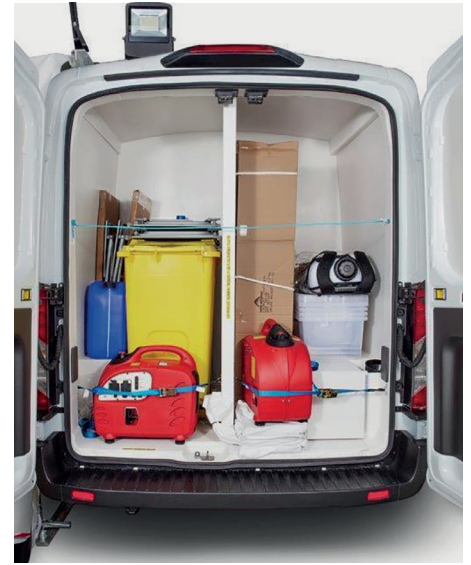

Do not make the mistake of purchasing Pop up tents that put your staff & public at high risk when the weather turns! **Invest in a product made in Britain and built to last and have the full support of our team.**

# CONVERTING AN EXISTING VEHICLE OR NEED A NEW VEHICLE?

We continue to work with an ever increasing number of coach builders and rental companies who can tailor make a mobile testing unit your specific requirements. Since the outbreak of COVID different vehicles have been converted to suit Track & Trace, Vaccination and Mobile Laboratories. All have a different build specification (awning windout or modular) but the awning is the common factor in all scenarios.

We currently have access to L3H3 Ford Transit Vans which were first generation MTU's, these are available short term lease or outright purchase from the rental company.

**These can be converted to suit your requirements.**

## CONTACT US TODAY – DEMAND IS HIGH SO THEY WILL NOT BE AVAILABLE FOR LONG!
